**CLICKSTREAM CORP.**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**  
**For the Six Months Ended March 31, 2016 and 2015 (Unaudited)**

**Note 1: Organization and Business**

History

We were incorporated in the state of Nevada on September 30, 2005 and previously operated under the name Peak Resources Incorporated. In August 2008, we changed our name to "Mine Clearing Corporation" (MCCO). The Company had been operating as an exploration division in the mining sector until May 2014.

On May 2, 2014, the Company acquired all of the outstanding shares of ClickStream Corporation, a Delaware corporation ("CS Delaware"), pursuant to a merger into a wholly-owned subsidiary of the Company. As part of the merger agreement, the Company issued a total of 600,798 shares of common stock in exchange for the entire issued and outstanding shares of MCCO of 600,798 shares of common stock.

Since former holders of Clickstream common stock owned, after the Merger, substantially all of MCCO's shares of common stock, and as a result of certain other factors, including that all members of the Company's executive management are members of Clickstream management, Clickstream is deemed to be the acquiring company for accounting purposes and the merger was accounted for as a reverse merger and a recapitalization in accordance with generally accepted accounting principles in the United States ("GAAP").

Subsequent to the merger, we have been operating as a data analytics tool developer and have sought to further develop and exploit our data analytics technology and proprietary algorithms.

Business Operations

ClickStream is a technology based data analytics company focused on development of analytical tools for high volume data analysis and related internet trends and associations. We are currently in late-stage development of a fantasy sports analytical service platform, DraftClick.

DraftClick is designed to assist in the fantasy sport player's ability to monitor changes in betting lines, breaking news releases, injury reports, real-time discussions in sports forums, fan sentiment, historical matchup data and other sources of data by incorporating all of this information into prediction results. These results are then presented using a tailored version of *DraftClick's* user interface which has been designed to enable seamless transition of player selections to fantasy game sites such as DraftKingsTM and FanDuelTM. We plan to launch *DraftClick* in the Fall of 2016.

**NOTE 2 – Basis of Presentation and Going Concern**

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles ("GAAP") as promulgated in the United States of America ("U.S.") and with instructions to Form 10-Q pursuant to the rules and regulations of Securities and Exchange Act of 1934, as amended (the "Exchange Act") and Article 8-03 of Regulation S-X under the Exchange Act. Accordingly, these condensed consolidated financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, we have included all adjustments considered necessary (consisting of normal recurring adjustments) for a fair presentation. Operating results for the three and six months ended March 31, 2016 are not indicative of the results that may be expected for the fiscal year ending September 30, 2016. You should read these unaudited condensed consolidated financial statements in conjunction with the audited financial statements and the notes thereto included in the Company's annual report on Form 10-12 G/A (as amended) for the year ended September 30, 2015 filed on January 20, 2016. The condensed consolidated balance sheet as of September 30, 2015 has been derived from the audited financial statements included in the Form 10-12 G/A for that year.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles which contemplate continuation of the Company as a going concern. The Company has not yet generated any revenues, has incurred recurring net losses since inception and has a working capital deficiency. During the six months ended March 31, 2016, the Company incurred a net loss of \$8,587,196 and as of March 31, 2016, the Company had a working capital deficiency and stockholders' deficit of \$9,084,032. These factors, among others, raise substantial doubt about the Company's ability to continue as a going concern. In addition, our independent auditors, in their report on our audited financial statements for the fiscal year ended September 30, 2015 expressed substantial doubt about our ability to continue as a going concern. The accompanying financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from an inability of the Company to continue as a going concern.

We are an early-stage company with a limited operating history, which makes it difficult to evaluate our current business and future prospects. As a result, the Company has limited operating history upon which an evaluation of the ClickStream's performance can be made. There have been no revenues generated from our business operations and we expect to incur further losses in the foreseeable future due to significant costs associated with our business development. There can be no assurance that our operations will ever generate sufficient revenues to fund our continuing operations, or that we will ever generate positive cash flow from our operations, or that we will attain or thereafter sustain profitability in any future period.

We will also attempt to raise additional debt and/or equity financing to fund operations and to provide additional working capital. There is no assurance that such financing will be available in the future or obtained in sufficient amounts necessary to meet the Company's needs, that the Company will be able to achieve profitable operations or that the Company will be able to meet its future contractual obligations. Should management fail to obtain such financing, the Company may curtail its operations.

Management believes it will take approximately \$3 million for operations and to launch DraftClick in the Fall of 2016. In October 2015, the Company hired a consultant to assist in raising the capital required.

### **NOTE 3- Summary of Significant Accounting Policies**

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Significant estimates for the years reported include certain assumptions used in deriving the fair value of share-based compensation. Assumptions and estimates used in these areas are material to our reported financial condition and results of our operations. Actual results will differ from those estimates.

#### Stock-Based Compensation

The Company periodically issues stock options and warrants to employees and non-employees in non-capital raising transactions for services and for financing costs. The Company accounts for stock option and warrant grants issued and vesting to employees based on the authoritative guidance provided by the Financial Accounting Standards Board whereas the value of the award is measured on the date of grant and recognized over the vesting period. The Company accounts for stock option and warrant grants issued and vesting to non-employees in accordance with the authoritative guidance of the Financial Accounting Standards Board whereas the value of the stock compensation is based upon the measurement date as determined at either a) the date at which a performance commitment is reached, or b) at the date at which the necessary performance to earn the equity instruments is complete.

Non-employee stock-based compensation charges generally are amortized over the vesting period on a straight-line basis. In certain circumstances where there are no future performance requirements by the non-employee, option grants are immediately vested and the total stock-based compensation charge is recorded in the period of the measurement date.

The fair value of the Company's common stock option and warrant grants is estimated using the Black-Scholes option pricing model, which uses certain assumptions related to risk-free interest rates, expected volatility, expected life of the common stock options, and future dividends. Compensation expense is recorded based upon the value derived from the Black-Scholes option pricing model, and based on actual experience. The assumptions used in the Black-Scholes option pricing model could materially affect compensation expense recorded in future periods.

#### Loss Per Share

The Company adopted FASB ASC Topic 260, Earnings Per Share. Basic earnings per share is based on the weighted effect of common shares issued and outstanding and is calculated by dividing net income (loss) available to common stockholders by the weighted average shares outstanding during the period. Diluted earnings per share is calculated by dividing net income available to common stockholders by the weighted average number of common shares used in the basic earnings per share calculation plus the number of common shares, if any, that would be issued assuming conversion of potentially dilutive securities outstanding. For all periods, potentially issuable securities are anti-dilutive.

As of March 31, 2016, the Company had 10 million stock warrants outstanding to purchase shares of common stock that were not included in the diluted net loss per common share because their effect would be anti-dilutive.

Fair Value Measurement

The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and paragraph 820-10-35-37 of the FASB Accounting Standards Codification ("Paragraph 820-10-35-37") to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America (U.S. GAAP), and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

- Level 1      Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2      Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.
- Level 3      Pricing inputs that are generally observable inputs and not corroborated by market data.

As of March 31, 2016, the carrying value of certain accounts such as accounts payable, accrued expenses and loan payable to shareholder approximates their fair value due to the short-term nature of such instruments.

As of March 31, 2016 the Company's balance sheet included the fair value of derivative liability of \$8,216,219, which was based on Level 2 measurements. The carrying amount of the Company's financial liabilities, such as loan payable, accounts payable and accrued expenses approximate their fair value because of the short maturity of those instruments.

### Derivative Financial Instruments

The Company evaluates its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the consolidated statements of operations. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative instrument liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument could be required within 12 months of the balance sheet date.

### Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers*. ASU 2014-09 is a comprehensive revenue recognition standard that will supersede nearly all existing revenue recognition guidance under current U.S. GAAP and replace it with a principle based approach for determining revenue recognition. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract. The ASU also will require additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU 2014-09 is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted only in annual reporting periods beginning after December 15, 2016, including interim periods therein. Entities will be able to transition to the standard either retrospectively or as a cumulative-effect adjustment as of the date of adoption. The Company is in the process of evaluating the impact of ASU 2014-09 on the Company's financial statements and disclosures.

In February 2016, the FASB issued Accounting Standards Update (ASU) No. 2016-02, *Leases*. ASU 2016-02 requires a lessee to record a right of use asset and a corresponding lease liability on the balance sheet for all leases with terms longer than 12 months. ASU 2016-02 is effective for all interim and annual reporting periods beginning after December 15, 2018. Early adoption is permitted. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. The Company is in the process of evaluating the impact of ASU 2016-02 on the Company's financial statements and disclosures.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

### **NOTE 4 – Loan Payable – Shareholder**

On September 17, 2014, the Company issued a promissory note to a shareholder for \$45,000. The note is unsecured and is due within ten days upon on the completion of an initial financing by the Company which is expected to be in 2016.

### **NOTE 5 – Stockholders' Deficit**

#### Common Stock

During the six months ended March 31, 2016, the Company issued a total of 1,375,000 shares of common stock to various consultants with a fair value of \$137,500 for services rendered. The shares were valued at \$0.10 per share based upon our recent sale of common stock for cash. The entire \$137,500 was expensed upon issuance and was reported as part of consulting and professional fees in the accompanying Statement of Operations.

### **NOTE 6 – DERIVATIVE LIABILITY**

In October 2015, the Company issued 10,000,000 warrants to a financial consultant. The warrant agreement included an anti-dilution provision that would reduce the exercise price if the Company were to issue similar instruments at a price below the exercise price of \$0.05 per share.

Pursuant to ASC Topic 815, "Derivatives and Hedging", the Company determined that these warrants met the definition of a derivative, and are to be re-measured at the end of every reporting period with the change in value reported in the statement of operations. As of October 19, 2015 (issuance date of the warrants) and March 31, 2016, the derivative liabilities were valued using a probability weighted average Black-Scholes-Merton pricing model with the following assumptions:

	<u>October 14, 2015 (issuance date)</u>	<u>March 31, 2016</u>
Stock Price	\$ 0.10	\$ 0.84
Risk-free interest rate	1.35%	1.21%
Expected volatility	152%	151%
Expected life in years	5	4.6
Expected dividend yield	0%	0%
<b>Fair Value:</b>	<b>\$ 938,221</b>	<b>\$ 8,216,219</b>

Stock price of \$0.10 per share at issuance date was based upon our recent sale of common stock for cash since our stock was not traded at that time. Stock price of \$0.84 per share at March 31, 2016 was based upon the closing price of our common stock on the over-the-counter market in the United States (commonly known as "the Pink Sheets") as a result of our stock being publicly traded starting in January 2016. The risk-free interest rate was based on rates established by the Federal Reserve Bank. The Company uses the averaged historical volatility of similar companies since we did not have sufficient market and historical information to estimate the volatility of our own stock. The expected life of the warrants was determined by the expiration dates of the warrants. The expected dividend yield was based on the fact that the Company has not paid dividends to its common stockholders in the past and does not expect to pay dividends to its common stockholders in the future.

At the issuance date of the warrants on October 14, 2015, the Company determined the fair value to be \$938,221, and was accounted for as a derivative liability and consulting costs. For the period ended March 31, 2016, the Company recorded a change in fair value of the derivative liability of \$7,277,997. As of March 31, 2016, the fair value of the derivative liabilities was \$8,216,219.

#### NOTE 7 – Warrants

The following schedule summarizes the changes in the Company's outstanding warrants during the three months ended March 31, 2016:

	<b>Warrants Outstanding Number of Shares</b>	<b>Exercise Price per Share</b>	<b>Weighted Average Remaining Contractual Life</b>	<b>Aggregate Intrinsic Value</b>	<b>Weighted Average Exercise Price per Share</b>
Balance at September 30, 2015	-	\$ -	-	-	\$ -
Warrants Granted	10,000,000	.05(1)			
Warrants Exercised	-				
Warrants Expired	-				
Balance at March 31, 2016	<u>10,000,000</u>	\$ .05(1)	4.65 years	\$ 0	\$ .05
Exercisable March 31, 2016	<u>10,000,000</u>	\$ .05(1)	4.65 years	\$ 0	\$ .05

- (1) In October 2015, the Company granted a financial consultant fully vested warrants to purchase up to 10,000,000 shares of common stock at an exercise price of \$0.05 per share for a period of five years. The warrant exercise price is subject to certain reset provisions in case the Company will sell or issue similar instrument in the future at a price lower than \$0.05 per share. As result, the fair value of these warrants of \$938,221 was accounted for as consulting cost and derivative liability upon issuance. See Note 6.

#### NOTE 8 – Related Party Transactions

Pursuant to a consulting agreement with a major shareholder of the Company, during the six months ended March 31, 2016 and 2015, the Company incurred consulting fees of \$35,000 and \$0, respectively for services rendered by the major shareholder and reported as part of Consulting and professional fees - Related Party in the accompanying Statement of Operations.

During the six months ended March 31, 2016 and 2015, the Company incurred \$20,000 and \$12,500, respectively for legal services rendered by a shareholder and officer of the Company and reported as part of Consulting –and professional fees - Related Party in the accompanying Statement of Operations.

During the six months ended March 31, 2016, the Company incurred an aggregate of \$63,000 for services rendered by the two officers of the Company and was reported as part of Consulting and professional fees - Related Party in the accompanying Statement of Operations. There was no similar transaction in 2015.

As of March 31, 2016 and September 30, 2015, the Company had accounts payable to our officers and the major shareholders in the amount of \$253,700 and \$144,500, respectively for unpaid consulting and professional fees. These amounts are unsecured, non-interest bearing and due upon demand.

During the six months ended March 31, 2016, the Company's office facility has been provided without charge by the Company's major stockholders. Such cost was not material to the financial statements and accordingly, have not been reflected therein. In view of the Company's limited operations and resources, management did not receive any compensation from the Company during the six months ended March 31, 2016 and 2015.

## **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

*The following discussion and analysis of our results of operations, financial condition and liquidity and capital resources should be read in conjunction with our unaudited financial statements and related notes for the six months ended March 31, 2016. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements.*

### **Overview**

The MD&A is based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make certain estimates and judgments that affect the reported amounts of assets, liabilities and expenses and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

### **Organization**

We were incorporated in the state of Nevada on December 30, 2005 and previously operated under the name Peak Resources Incorporated. Effective August 18, 2008, we changed our name to "Mine Clearing Corporation" (MCCO). The Company had been operating as an exploration division in the mining sector until May 2014.

On April 25, 2014, the Company's shareholders adopted Amended and Re-Styled Articles of Incorporation, (the "New Articles"). The New Articles provided for a one for 300 reverse split of all outstanding shares of common stock, authorization of 5 million shares of "blank check" preferred stock, an increase in the authorized shares of common stock to 300,000,000 shares and changing the name of the Company to ClickStream Corporation. All share and per share amounts have been adjusted to reflect the one for 300 reverse split of the common stock as of the earliest period presented.

On May 2, 2014, the Company acquired all of the outstanding shares of ClickStream Corporation, a Delaware corporation ("CS Delaware"), pursuant to a merger into a wholly-owned subsidiary of the Company. As part of the merger agreement, the Company issued a total of 600,798 shares of common stock in exchange for the entire issued and outstanding shares of MCCO of 600,798 shares of common stock.

Since former holders of Clickstream common stock owned, after the Merger, substantially all of MCCO's shares of common stock, and as a result of certain other factors, including that all members of the Company's executive management are members of Clickstream management, Clickstream is deemed to be the acquiring company for accounting purposes and the merger was accounted for as a reverse merger and a recapitalization in accordance with generally accepted accounting principles in the United States ("GAAP").

Subsequent to the merger, we have been operating as a data analytics tool developer and have sought to further develop and exploit our data analytics technology and proprietary algorithms.

### **Our Business**

ClickStream is a technology based data analytics company focused on development of analytical tools for high volume data analysis and related internet trends and associations. We are currently in late-stage development of a fantasy sports analytical service platform, DraftClick.

DraftClick is designed to assist in the fantasy sport player's ability to monitor changes in betting lines, breaking news releases, injury reports, real-time discussions in sports forums, fan sentiment, historical matchup data and other sources of data by incorporating all of this information into prediction results. These results are then presented using a tailored version of *DraftClick's* user interface which has been designed to enable seamless transition of player selections to fantasy game sites such as DraftKings™ and FanDuel™. *DraftClick* uses over 40 types of algorithms and it uses over 100 player specific variables as input data points. The specific algorithms to use for each player each day is selected by the system based on the training data. The training data consists of thousands of historical contests where the outcome is known and the values of the data points are known before and after each contest. This so-called historical "back testing" is also used to establish proper confidence levels. As each day goes by, the set of training data increases by the outcomes for that day. We plan to launch *DraftClick* in the Fall 2016.

## Results of Operations

### Comparison of Results of Operations for the Three months Ended March 31, 2016 and 2015

Below is a discussion of our operating results for the six months ended March 31, 2016, compared to our operating results during the comparable period in 2015. Net loss for the three months ended March 31, 2016, was \$7,380,023 compared to net loss of \$93,860 for the three months ended March 31, 2015. The increase in net loss resulted from an increase in change in fair value of derivative liability, as described below.

#### Operating Expenses.

	<u>3/31/2016</u>	<u>3/31/2015</u>	<u>Change</u>	<u>% Change</u>
Consulting and professional fees	\$ 39,770	\$ 47,300	\$ (7,530)	-16%
Consulting and professional fees – related party	51,500	7,500	44,000	587%
Research and development	-	21,900	(21,900)	(100%)
General and administrative	5,555	17,160	(11,605)	-97%
Total Operating Expenses	<u>\$ 96,825</u>	<u>\$ 93,860</u>	<u>\$ 2,965</u>	<u>3%</u>

For the three months ended March 31, 2016, Consulting and professional fees decreased by \$7,530 as compared to the prior period as the Company did not have the capital required and slowed down operations. As such the Company did not retain various consultants during the current period ended.

For the three months ended March 31, 2016, Consulting and professional fees – related party increased by \$44,000 as compared to the prior period as additional finance and legal fees were incurred by the Company as a result of the Company becoming a reporting entity and filing requirements with the Securities Exchange Commission.

For the three months ended March 31, 2016, Research and development costs decreased by \$21,900 as compared to the prior period as the Company did not have the capital required and slowed down research and development of the product. As such there was no work performed on the Company's development of analytical tools for high volume data analysis and related internet trends and associations.

For the three months ended March 31, 2016, General and administrative expenses decreased by \$11,605 as compared to the prior period as the Company did not have the capital required and slowed down operations. The aggregate decrease in these costs results primarily to the reduction of travel costs, meals and entertainment and bank charges.

#### Other Expense.

	<u>3/31/2016</u>	<u>3/31/2015</u>	<u>Change</u>	<u>% Change</u>
Change in fair value of derivative liability	\$ 7,283,198	\$ -	\$ 7,283,198	N/A
Total Other Expense	<u>\$ 7,283,198</u>	<u>\$ -</u>	<u>\$ 7,283,198</u>	<u>N/A</u>

Change in fair value of derivative liability increased by \$7,283,198 as compared to the prior period where there was no derivative liability.

### Comparison of Results of Operations for the 6 months Ended March 31, 2016 and 2015

Below is a discussion of our operating results for the six months ended March 31, 2016, compared to our operating results during the comparable period in 2015. Net loss for the six months ended March 31, 2016, was \$8,587,196 compared to net loss of \$166,097 for the six months ended March 31, 2015. The increase in net loss resulted from an increase in consulting expense and change in fair value of derivative liability, as described below.

#### Operating Expenses.

	<u>3/31/2016</u>	<u>3/31/2015</u>	<u>Change</u>	<u>% Change</u>
Consulting and professional fees	\$ 1,180,544	\$ 52,300	\$ 1,128,244	2,157%
Consulting and professional fees – related party	118,000	12,500	105,500	844%
Research and development	-	50,575	(50,575)	(100%)
General and administrative	10,655	50,722	(40,067)	(79%)
Total Operating Expenses	<u>\$ 1,309,199</u>	<u>\$ 166,097</u>	<u>\$ 1,143,102</u>	<u>688%</u>

For the six months ended March 31, 2016, Consulting and professional fees increased by \$1,128,244 as compared to the prior period as additional consultants were retained by the Company. The majority of the increase relates to grant of fully vested warrants to a financial consultant to purchase up to 10,000,000 shares of common stock at an exercise price of \$0.05 per share for a period of five years. The warrant exercise price is subject to certain reset provisions in case the Company will sell or issue similar instrument in the future at a price lower than \$0.05 per share. As result, these warrants were accounted for as consulting costs and a derivative liability with a fair value of \$938,221 at the date of grant. In addition, the Company also issued shares of common stock for services with a fair value of \$137,500.

For the six months ended March 31, 2016, Consulting and professional fees – related party increased by \$105,500 as compared to the prior period as additional finance and legal fees were incurred by the Company.

For the six months ended March 31, 2016, Research and development costs decreased by \$50,575 as compared to the prior period as the Company did not have the capital required and slowed down research and development of the product.

For the six months ended March 31, 2016, General and administrative expenses decreased by \$40,067 as compared to the prior period as the Company did not have the capital required and slowed down operations.

**Other Expense.**

	<u>3/31/2016</u>	<u>3/31/2015</u>	<u>Change</u>	<u>% Change</u>
Change in fair value of derivative liability	\$ 7,277,997	\$ -	\$ 7,277,997	N/A
Total Other Expense	<u>\$ 7,277,997</u>	<u>\$ -</u>	<u>\$ 7,277,997</u>	<u>N/A</u>

Change in fair value of derivative liability decreased by \$7,277,997 as compared to the prior period where there was no derivative liability.

**Liquidity**

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles which contemplate continuation of the Company as a going concern. The Company has not yet generated any revenues, has incurred recurring net losses since inception and has a working capital deficiency. During the six months ended March 31, 2016 the Company incurred a net loss of \$8,587,196 and as of March 31, 2016, the Company had a working capital deficiency and stockholders' deficit of \$9,084,032. These factors, among others, raise substantial doubt about the Company's ability to continue as a going concern. In addition, our independent auditors, in their report on our audited financial statements for the fiscal year ended September 30, 2015 expressed substantial doubt about our ability to continue as a going concern. The accompanying financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from an inability of the Company to continue as a going concern.

We are an early-stage company with a limited operating history, which makes it difficult to evaluate our current business and future prospects. As a result the company has limited operating history upon which an evaluation of the ClickStream's performance can be made. There have been no revenues generated from our business operations and we expect to incur further losses in the foreseeable future due to significant costs associated with our business development. There can be no assurance that our operations will ever generate sufficient revenues to fund our continuing operations, or that we will ever generate positive cash flow from our operations, or that we will attain or thereafter sustain profitability in any future period.

We will also attempt to raise additional debt and/or equity financing to fund operations and to provide additional working capital. There is no assurance that such financing will be available in the future or obtained in sufficient amounts necessary to meet the Company's needs, that the Company will be able to achieve profitable operations or that the Company will be able to meet its future contractual obligations. Should management fail to obtain such financing, the Company may curtail its operations.

Management believes it will take approximately \$3 million for operations and to launch DraftClick in the Fall of 2016. In October 2015, the Company hired a consultant to assist in raising the capital required.

*Comparison of Cash Flows for the Six months Ended March 31, 2016 and 2015*

Cash totaled \$0 at March 31, 2016 and 2015, respectively. The change in cash is as follows:

	<u>3/31/2016</u>	<u>3/31/2015</u>	<u>Change</u>
Cash Used in Operating Activities	\$ -	\$ (165,731)	\$ 165,731
Cash Provided by Financing Activities	-	100,000	(100,000)
Increase (Decrease) in Cash	<u>\$ -</u>	<u>\$ (65,731)</u>	<u>\$ 65,731</u>

### ***Operating Activities***

Cash used in operating activities in the six months ended March 31, 2016 was \$0 as compared to cash used of \$165,731 during the prior period, representing an increase in cash used in operating activities of \$165,731 based on the operating results discussed above.

### ***Financing Activities***

Cash generated from financing activities during the six months ended March 31, 2016 was \$0 as compared to \$100,000 generated in the comparable period in 2015 representing a decrease of \$100,000. During the period ended March 31, 2015, the Company received proceeds from the sale of its common stock of \$100,000.

### **Capital Resources**

As of March 31, 2016, the Company does not have any material commitments for capital expenditures.

### **Critical Accounting Policies**

The Company's accounting policies are described in Note 3 in the accompanying financial statements. Below is a summary of the critical accounting policies, among others, that management believes involve significant judgments and estimates used in the preparation of its financial statements.

#### *Use of Estimates*

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Significant estimates for the years reported include certain assumptions used in deriving the fair value of share-based compensation. Assumptions and estimates used in these areas are material to our reported financial condition and results of our operations. Actual results will differ from those estimates.

#### *Stock-Based Compensation*

The Company periodically issues stock options and warrants to employees and non-employees in non-capital raising transactions for services and for financing costs. The Company accounts for stock option and warrant grants issued and vesting to employees based on the authoritative guidance provided by the Financial Accounting Standards Board whereas the value of the award is measured on the date of grant and recognized over the vesting period. The Company accounts for stock option and warrant grants issued and vesting to non-employees in accordance with the authoritative guidance of the Financial Accounting Standards Board whereas the value of the stock compensation is based upon the measurement date as determined at either a) the date at which a performance commitment is reached, or b) at the date at which the necessary performance to earn the equity instruments is complete.

Non-employee stock-based compensation charges generally are amortized over the vesting period on a straight-line basis. In certain circumstances where there are no future performance requirements by the non-employee, option grants are immediately vested and the total stock-based compensation charge is recorded in the period of the measurement date.

The fair value of the Company's common stock option and warrant grants is estimated using the Black-Scholes option pricing model, which uses certain assumptions related to risk-free interest rates, expected volatility, expected life of the common stock options, and future dividends. Compensation expense is recorded based upon the value derived from the Black-Scholes option pricing model, and based on actual experience. The assumptions used in the Black-Scholes option pricing model could materially affect compensation expense recorded in future periods.

### Derivative Financial Instruments

The Company evaluates its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the consolidated statements of operations. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative instrument liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument could be required within 12 months of the balance sheet date. The fair value of these derivative liabilities were estimated using a probability weighted average Black-Scholes-Merton pricing model which uses certain assumptions related to risk-free interest rates, expected volatility, expected life of the warrants, and future dividends. The assumptions used in the calculation could materially affect the recorded fair value of the derivative liability in future periods.

### **Recent Accounting Pronouncements**

Recent Accounting Pronouncements applicable to the Company are discussed in notes the Financial Statements included elsewhere in this Form 10Q.

### **Off Balance Sheet Arrangements**

As of March 31, 2016, the Company has no off-balance sheet arrangements.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

Not applicable.

### **ITEM 4. CONTROLS AND PROCEDURES.**

#### **Disclosure Controls and Procedures**

Our principal executive officer and principal financial officer evaluated the effectiveness of our “disclosure controls and procedures” (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the United States Securities Exchange Act of 1934, as amended), as of March 31, 2016. Based on that evaluation we have concluded that our disclosure controls and procedures were not effective as of March 31, 2016.

#### **Management’s Report on Internal Control over Financial Reporting**

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended, as a process designed by, or under the supervision of, a company’s principal executive and principal financial officers and effected by a company’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations and can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

As of March 31, 2016, management of the Company conducted an assessment of the effectiveness of the company's internal control over financial reporting. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. In the course of the assessment, material weaknesses were identified in the company's internal control over financial reporting.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

Management determined that fundamental elements of an effective control environment were missing or inadequate as of March 31, 2016. The most significant issues identified were: 1) lack of segregation of duties due to very small staff and significant reliance on outside consultants, and 2) risks of executive override also due to lack of established policies, and small employee staff. Based on the material weaknesses identified above, management has concluded that internal control over financial reporting was not effective as of March 31, 2016. As the company's operations increase, the company intends to hire additional employees in its accounting department.

#### **Changes in Internal Control over Financial Reporting**

There were no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### **Inherent Limitations Over Internal Controls**

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations, including the possibility of human error and circumvention by collusion or overriding of controls. Accordingly, even an effective internal control system may not prevent or detect material misstatements on a timely basis. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

**PART II - OTHER INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS.**

There are presently no material pending legal proceedings to which the Company is a party or as to which any of its property is subject, and no such proceedings are known to the Company to be threatened or contemplated against it.

**ITEM 1A. RISK FACTORS.**

Not applicable.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**

None.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES.**

There were no reportable events under this Item 3 during the three months ended March 31, 2015.

**ITEM 4. MINE SAFETY DISCLOSURES.**

Not applicable.

**ITEM 5. OTHER INFORMATION.**

None.

**ITEM 6. EXHIBITS.**

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934 as amended, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

**CLICKSTREAM CORP.**

Date: May 24, 2016

By: /s/ Michael O'Hara  
Michael O'Hara, Chairman of the Board, President and  
Interim Principal Executive Officer  
(Principal Executive Officer)

Date: May 24, 2016

By: /s/ Michael Handelman  
Michael Handelman, Chief Financial Officer  
(Principal Financial and Accounting Officer)

**EXHIBIT 31.1**

**CERTIFICATION**

I, Michael O'Hara, certify that:

1. I have reviewed this 10-Q of Clickstream Corp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
